Easter. Enjoy your eggs!

From all the staff at
Taranaki Medlab!

Parathyroid Hormone – Change of specimen

Due to a change in methodology we now require 1 (one) EDTA (purple top) tube for this test.

EBVs

When requesting EBV please include a routine Complete Blood Count (CBC). The haematological picture aids the process of adding relevant comments to the final report.

Offsite collection of bloods

Please mix all tubes immediately after collection to prevent clots forming in the tubes. A minimum of 8 gentle inversions is recommended.
